

ABOUT NAMA

The National Association of Municipal Advisors is the only professional organization dedicated to representing and serving Municipal Advisors. The core members of the organization are independent Municipal Advisory firms. Since 2010, NAMA members now include individual MAs, broker/dealer MAs and other professionals.

NAMA serves as a collective voice for the Municipal Advisor industry when responding to regulatory and legislative proposals impacting MA practices and services. Over the past five years, NAMA has submitted dozens of comment letters to the SEC and MSRB on MA Rulemaking and other municipal market initiatives. NAMA comment letters to the SEC and MSRB have led to positive changes for MAs in final rulemaking.

Through involvement in numerous forums, working groups and roundtables, the Association is recognized by regulators and other market leaders as the key voice for the municipal advisor profession. Ongoing dialogue with SEC and MSRB representatives, including examiners, have helped member firms better understand and prepare for the rulemaking and exam processes.

NAMA provides its members with numerous educational and networking opportunities. Robust association communications and peer to peer discussion groups are also NAMA priorities.

WHY BECOME A NAMA MEMBER?

There are numerous benefits to becoming a NAMA member. These include:

- Being aware and apart of NAMA's comments and engagements related to regulatory activities, as well as municipal market events and endeavors
- Access to "members only" resources focused on compliance and MA firm business practices
- Educational offerings including webinars, conferences, and specific issue focused summits.
- Networking opportunities through Committees, members-only communications, and the annual conference
- Member only discounts for NAMA events

There is no better time to be part of an organization that puts the interests of MAs first. As compliance and MA business responsibilities continue to grow, joining a collective group seeking positive outcomes for the profession can only help your Firm and the MA profession.
